"The most important concert venue in the history of Phish is not a field in Maine or a mountain in Vermont. It's a building on 33rd Street in Manhattan. And you've been there 56 times."

YOUR PHISH TIMELINE

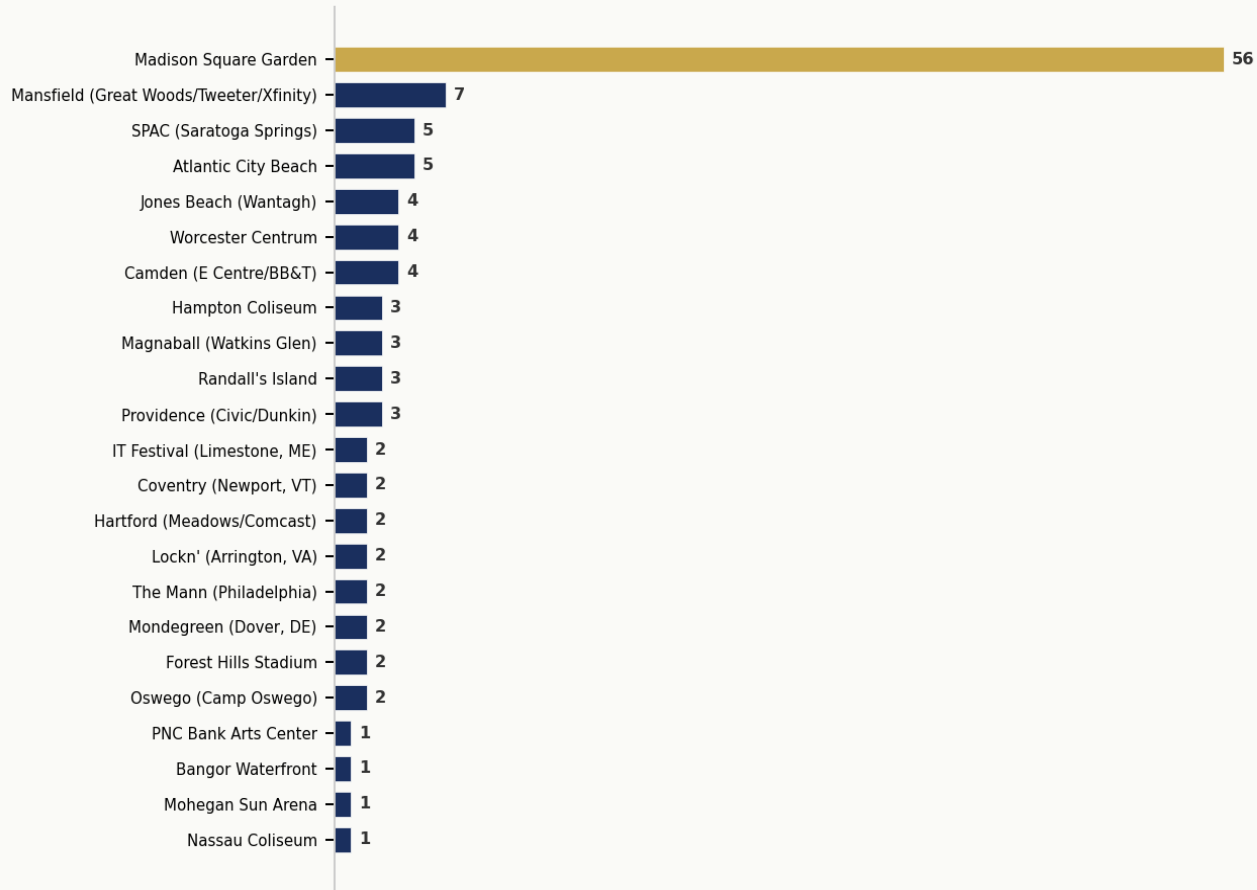

The timeline tells the whole story: a 1.0 beginning in New England, a brief 2.0 burst that ended at Coventry, a five-year gap, then steady acceleration from 2009 through the 2017 peak of the Baker's Dozen. The COVID dip was universal. Since 2022, you've been averaging 7 shows a year — steady commitment through the band's 4.0 era.

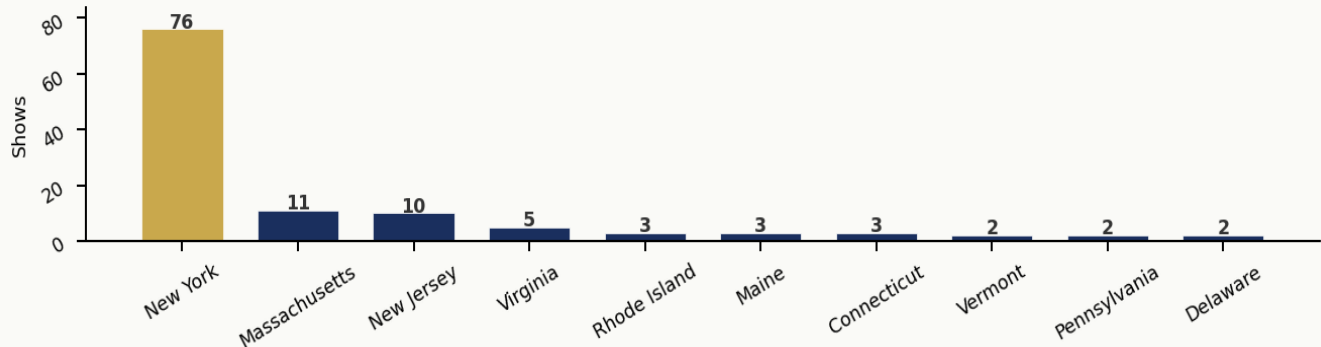

December dominates with 37 shows — 10 NYE countdowns plus the surrounding December runs. July is second with 33, driven by Baker's Dozen, SPAC, Jones Beach, and summer tours. August rounds out the top three at 25 — festivals and AC Beach shows. Friday edges out Saturday 27-25, with Sunday a close third at 23. You're there for full runs, not cherry-picking nights.

YOUR PHISH GEOGRAPHY

The dominance of MSG is staggering — 56 of 117 shows, nearly half your entire career, in one building. Beyond the Garden, your world is the Northeast Corridor: Mansfield was the 1.0 base, SPAC and Jones Beach are the summer amphitheatres, and Atlantic City became the post-COVID landing pad. You've never seen Phish west of the Appalachians. The furthest south: Hampton, Virginia. The furthest north: Limestone, Maine for IT.

SHOWS BY STATE

New York accounts for 76 of 117 shows — 65%. Massachusetts (11) and New Jersey (10) are distant second and third. You've attended shows in 10 states, all on the Eastern Seaboard. Virginia is the southernmost (Hampton + Lockn'). Vermont the most remote (Coventry).

SONGS YOU KNOW BY HEART

Most-Heard Songs — Estimated Frequency Across 117 Shows

Based on typical setlist patterns. Exact counts pending full setlist verification.

117 shows means you've developed an encyclopedic familiarity with the rotation. Tweezer, Disease, and Mike's Song are the backbone — you've heard dozens of versions and have strong opinions about which ones peaked and which ones found new territory. The 4.0 additions like Sigma Oasis and Everything's Right are now permanent fixtures. With 56 MSG shows, you've heard the indoor versions of everything — the acoustics, the energy, the way the Garden responds to a Hood peak or a Slave crescendo.

12/31/2024 — Tweezer (Set 3)

NYE 2024. Set 3 featured the it's-ice-cream gag — dancers from past NYE gags emerged from a giant freezer. Tweezer featured lyrics sung in multiple languages.

★ 06/02/2009 — Fluffhead

YOUR ERAS

ERA I: THE BEGINNING — 1.0 (1995–2000)

13 shows

You entered the Phish world in the summer of 1995 at Great Woods, Mansfield. This was peak 1.0 — the band at full creative velocity. Worcester Centrum winters, Tweeter Center summers, Camp Oswego for the festival experience, and Camden for the Jersey detours. 13 shows in six years. You were building the foundation of a 30-year relationship. The improvisational language you learned in these rooms is still the benchmark everything else gets measured against.

ERA II: THE TWILIGHT — 2.0 (2003–2004)

6 shows

The hiatus ended and you were back — Worcester in February 2003, IT Festival in Maine that August. But something was different. The band was fraying. You saw three more shows in 2004: Tweeter Center, then the final two at Coventry. You were there at the end. The mud, the emotions, the feeling that this might actually be over. It gave you context that most post-2009 fans will never have.

ERA III: THE REUNION — EARLY 3.0 (2009–2013)

18 shows

Five years of silence, and then Jones Beach, June 2, 2009. The reunion. You were there opening night. The early 3.0 years were about rebuilding: Camden, Hartford, SPAC, Holmdel. The band was more careful, more grateful. Your first MSG December run in 2012 — all four nights — changed everything. That's when MSG became home. 18 shows in five years. The acceleration had begun.

ERA IV: THE PEAK — 3.0 MATURITY (2014–2017)

35 shows

This is where it exploded. Randall's Island in 2014. Magnaball — all three days. NYE runs every year. SPAC three-night runs. Lockn' Festival. And then the Baker's Dozen: 13 nights at MSG, no repeat songs, and you were there for 12 of them. 35 shows in four years. You went from serious fan to lifer. The Baker's Dozen alone accounts for 12 of those 35 — a stretch of commitment that puts you in rare company among the Phish faithful.

ERA V: THE PRESENT — 3.0 LATE + 4.0 (2018–2025)

45 shows

Hampton Coliseum in October 2018. Every NYE run since. Camden, Mohegan Sun, Nassau. The COVID gap — 591 days without a show — broken at Atlantic City Beach in August 2021. Since the return, you've averaged 5-9 shows a year: MSG spring and summer runs, AC Beach, Jones Beach, The Mann in Philly, Mondegreen in Dover, Forest Hills in Queens. 45 shows in eight years. Your most prolific era. You're seeing more Phish now than at any point in your 30-year history.

THE TIER LIST

Every show ranked. Subjective by nature — but informed by community consensus, jam chart entries, and the weight of historical significance. Your 117 shows include some of the most celebrated performances of the 3.0 and 4.0 eras.

S TIER

Baker's Dozen N1 (7/21/2017) & N13 (8/6/2017) — The bookends of the greatest residency in rock history. Night 1 opened with a statement. Night 13 closed with the Powdered Donuts set and a 237-song, zero-repeat achievement.

12/31/2016 — MSG NYE — Petrichor debut spanning the midnight countdown. One of the most ambitious NYE sets in Phish history.

12/31/2019 — MSG NYE — The pre-COVID farewell. A Tweezer for the ages. Nobody knew this would be the last normal show for 591 days.

10/20/2018 — Hampton Coliseum N2 — The Hampton run that shook the community. Night 2 is the consensus pick — deep, exploratory, relentless.

Magnaball (8/21-23/2015) — Three days at Watkins Glen. The drive-in set. This was 3.0 at its absolute apex. Full festival experience, peak band.

A TIER

12/31/2012 — MSG NYE — Your first MSG New Year's. The beginning of a tradition that now spans 10 countdowns.

Randall's Island run (7/11-13/2014) — Three nights on an island in the East River. Outdoor NYC Phish at its finest.

Baker's Dozen N6, N7, N8 (7/28-30/2017) — The mid-run sweet spot. The band was locked in and the no-repeat concept was driving creative choices.

12/31/2023 — MSG NYE — The most recent complete NYE run. Four nights, all attended. Peak 4.0 consistency.

Atlantic City Beach 2021 return — The first shows after COVID. Three nights on the beach. The emotional weight of hearing live Phish again after 591 days.

B TIER

MSG December runs (2013, 2015-16, 2017, 2018, 2022-25) — The annual pilgrimage. Consistent, reliable, occasionally transcendent. The backbone of your calendar.

SPAC runs (2009, 2010, 2016) — Upstate New York summer amphitheatre. Beautiful setting, strong performances.

Jones Beach shows (2009, 2012, 2013, 2022) — Long Island summer Phish. The 2009 shows carry reunion energy.

Hampton Coliseum N1 & N3 (10/19 & 10/21/2018) — Strong bookends to a legendary Night 2. The Mothership delivered.

Mansfield/Xfinity shows (2014, 2016) — The 3.0 return to your 1.0 home base.

C TIER

1.0 New England shows (1995-2000) — The foundation. You didn't know enough to rank them then, and the recordings don't always capture what you felt. But they made everything else possible.

Coventry (8/14-15/2004) — The end. The mud. The tears. C tier musically — the band was broken. S tier emotionally — you were there when it mattered most.

Early 3.0 one-offs (PNC, Bangor, Mohegan Sun) — Solid shows at smaller venues. Part of the rebuilding years.

CROWN JEWELS

The shows you tell people about. The ones that changed how you hear this band.

★ THE BAKER'S DOZEN — MSG, JULY-AUGUST 2017

12 of 13 shows attended | 237 songs, zero repeats

Thirteen consecutive nights at Madison Square Garden. No song played twice. You were there for 12 of them. The logistics alone — coordinating nearly two weeks of shows in Manhattan — represent a level of commitment that most fans only dream about. The musical achievement was unprecedented: 237 unique songs across 13 nights, each show themed around a different donut flavor, each setlist a self-contained artistic statement. This is the centerpiece of your Phish career. Everything before it was prologue. Everything since has been measured against it.

★ COVENTRY — NEWPORT, VT, AUGUST 14-15, 2004

Both days attended | The final show(s) of 1.0/2.0

You drove to northern Vermont for what everyone believed would be the last Phish shows ever. The mud was legendary. The band was struggling. Trey could barely play. And yet — you were there. When the five-year hiatus ended in 2009, every reunion show carried extra weight for the people who'd been at Coventry. You earned that weight.

★ HAMPTON COLISEUM — OCTOBER 19-21, 2018

Three-night run | Night 2 = consensus 3.0 classic

The Mothership. Hampton Coliseum has a special place in Phish lore — it's where they came back in 2009, and it's where some of the most exploratory shows happen. Your October 2018 three-night run caught the band at a creative peak. Night 2 in particular has been cited as one of the strongest 3.0 performances, with extended jams that pushed into genuinely new territory.

★ NYE 2019 — MSG, DECEMBER 31, 2019

Four-night run attended | The last normal show before COVID

Nobody knew it at the time, but this was the end of an era. The December 2019 run was the last time you'd hear live Phish for 591 days. The NYE set included a Tweezer that has entered the canon as one of the band's finest late-career improvisations. The emotional weight of this show only grew in retrospect — it was the farewell to normalcy.

THE GREAT DEBATES

ARE YOU A LIFER?

117 shows across 30 years. You survived Coventry, the five-year hiatus, the COVID gap. You've attended shows in 23 different venues across 10 states. You've been to 6 festivals. You have 10 NYE countdowns at MSG. You were there for 12 of 13 Baker's Dozen shows. You have 10 NYE countdowns at MSG spanning 2012 to 2025.

Verdict: Not a question. Certified lifer. The 117-show count puts you well into the top tier of the Phish fanbase. The Baker's Dozen commitment alone is a credential.

MSG: HOME COURT OR COMFORT ZONE?

56 of your 117 shows — 47% — have been at Madison Square Garden. That's an extraordinary concentration. The case for: MSG sounds incredible, the energy of NYE runs is unmatched, and the Baker's Dozen could only happen there. The case against: you've never seen Phish at Alpine Valley, Dick's, or any West Coast venue. You've never heard the band outdoors under open sky at a proper amphitheatre run.

Verdict: It's not a comfort zone — it's a specialty. You're an MSG expert. But the geographic expansion to Philly, Queens, and AC Beach in recent years shows awareness that the Garden isn't the only room that matters.

WHAT'S MISSING FROM YOUR RESUME?

No Halloween shows. No Dick's runs. No Alpine Valley. No West Coast — no LA, no SF, no Gorge. No Mexico. You've never been south of Hampton, Virginia or west of Watkins Glen. The entire Western and Southern Phish experience is a blank page.

Verdict: The Sphere in 2026 would be the obvious next chapter. Nine nights in Las Vegas would blow the geographic constraints wide open and add an entirely new dimension to a 30-year, 117-show career that has been almost exclusively Northeast.

WHAT YOU MISSED

The shows that happened within your era that you weren't at. Some of these hurt.

Big Cypress (12/30/1999–1/1/2000)

The millennium show. Sunrise set. 60,000 people in the Everglades. The defining event of 1.0. You were active in 1999 — Oswego, Camden, Mansfield. But you weren't in Florida.

Baker's Dozen Night 9 (8/1/2017)

The one you missed. 12 of 13 is remarkable, but the gap stings. Maple Night — O Canada opener, Golden Age, Swept Away > Steep, 46 Days, Piper, Possum.

Halloween Shows

Zero Halloween shows across 30 years. No musical costumes. No Remain in Light, no Ziggy Stardust, no Kasvot Vaxt. A genuine gap in the resume.

Dick's Sporting Goods Park (any year)

The Labor Day tradition in Commerce City, Colorado. Three-night runs, consistent excellence. You've never been west enough to attend.

Alpine Valley (any show)

The Midwest cathedral. The hill, the lot, the jams that go long. For many fans, Alpine IS Phish. You've never experienced it.

The Sphere 2024 (4/18-21/2024)

Four nights. 160,000+ sq ft of LED. Immersive visuals that redefined what a Phish show could look like. \$4M+ raised for the Divided Sky Foundation. But Sphere 2026 is coming — nine nights across three weekends.

The Gorge (any year)

George, Washington. The most beautiful outdoor venue in America. Phish at sunset over the Columbia River Gorge. Still on the bucket list.

Mexico (any year)

The annual destination event in Riviera Maya. Four nights, all-inclusive, Caribbean Phish. The ultimate vacation show.

THE STATE OF PHISH — 2026

THE SPHERE RETURNS

Nine nights at the Sphere in Las Vegas — April 16-18, 23-25, and 30-May 2, 2026. Three weekends of immersive performances inside the 18,600-seat LED-dome venue. After the 2024 four-night debut drew universal acclaim, this expanded run is the hottest ticket in live music. For someone who's never been west of Watkins Glen, this would be transformative.

ROCK HALL SNUB

First-ever nomination in 2025. Won the fan vote with 329,281 votes — nearly 50K ahead of Bad Company. Not inducted. The fan vote counts as 1 of 1,200+ ballots. They've never had a Billboard Hot 100 single but remain one of the highest-grossing live acts in music.

THE DIVIDED SKY FOUNDATION

Every show you've attended since 2009 exists because Trey got sober. The Divided Sky Residential Recovery Program in Ludlow, Vermont — a 46-bed, nonmedical, abstinence-based residential program rooted in the 12 Steps, emotional sobriety, and mindfulness. The 2024 Sphere benefit shows generated \$4M+ for the Foundation. This is the architecture of Trey's second act.

42 YEARS AND COUNTING

Formed in Burlington, Vermont in 1983. Trey Anastasio, Jon Fishman, Mike Gordon, Page McConnell. 16 studio albums. LivePhish recordings of every show since 2002. The Mockingbird Foundation. The WaterWheel Foundation. Mondegreen. The Sphere. The band is playing with a creative confidence that rivals any era in their history.
